

# Gabriel Cavalcante Causin

## Front-end developer

I am front-end developer and currently looking for placement in the area. I'm aware that nothing big can be built on its own, because of that I value shared learning between people. I want to learn and acquire new skills, thus helping people with the knowledge I have and will have.

## WORK EXPERIENCE

### Co-Founder

#### Duo Market LLC

06/2019 - 10/2021

*Co-founder of a company that teaches Brazilians to invest in the American Stock Exchange.*

##### Achievements/Tasks

- In the two years that I worked as head of marketing, financial manager and managing a team of 6 people; the company generated more than 250k in revenue.
- In the leadership of this team, we structured: sales funnels, pages, and platforms with investments contents (using HTML, CSS and JAVASCRIPT).

## PROJECTS

### 1) Marvelous Battle:

- Project carried out with a group of 4 people during boot camp.
- I worked in the programming of all the necessary JavaScript and in the implementation of the APIs.
- During this project I understood how to work in a team using GitHub, mainly with the methodology: Agile Software Development Cycle.

### 2) Weather Dashboard

- Project developed based on the open weather API, JS, HTML and BootStrap
- In it, it is possible to check the temperature of several American cities.
- In this project I understood how to use external APIs in a web page and manipulate its data.

### 3) Quiz Game

- Project developed mostly with JavaScript.
- In this project I managed to improve my knowledge with JSON, ARRAY's and OBJECTS.

## EDUCATION

### Coding Boot Camp

#### UCF - The University of Central Florida (A+)

10/2021 - Present

##### Courses

- During the boot camp I had the opportunity to carry out more than 20 projects, including: read.me Generator, Password Generator, Ecommerce, and many others.
